

MV155 Battery power data logger with wireless communication

Wireless communication - Lithium or alkaline batteries - Multichannel logger - Encrypted data - Designed for harsh environments

KEY FEATURES

Smart battery management

Lithium or Alkaline batteries – external power supply available

External sensors power supply available

4G wireless communication protocol – optional DNP3 protocol

High level of data security through encrypted transmission

IP68 protection with MIL connectors: suitable for harsh environments

I/O Modules

Different options available:

- Up to 4 digital IN with flow calculation
- Up to 2 ON/OFF IN
- Up to 2 analogue IN either for Voltage or Current
- Up to 2 analogue IN for Pressure or Temperature
- Up to 2 alarm or event digital OUT

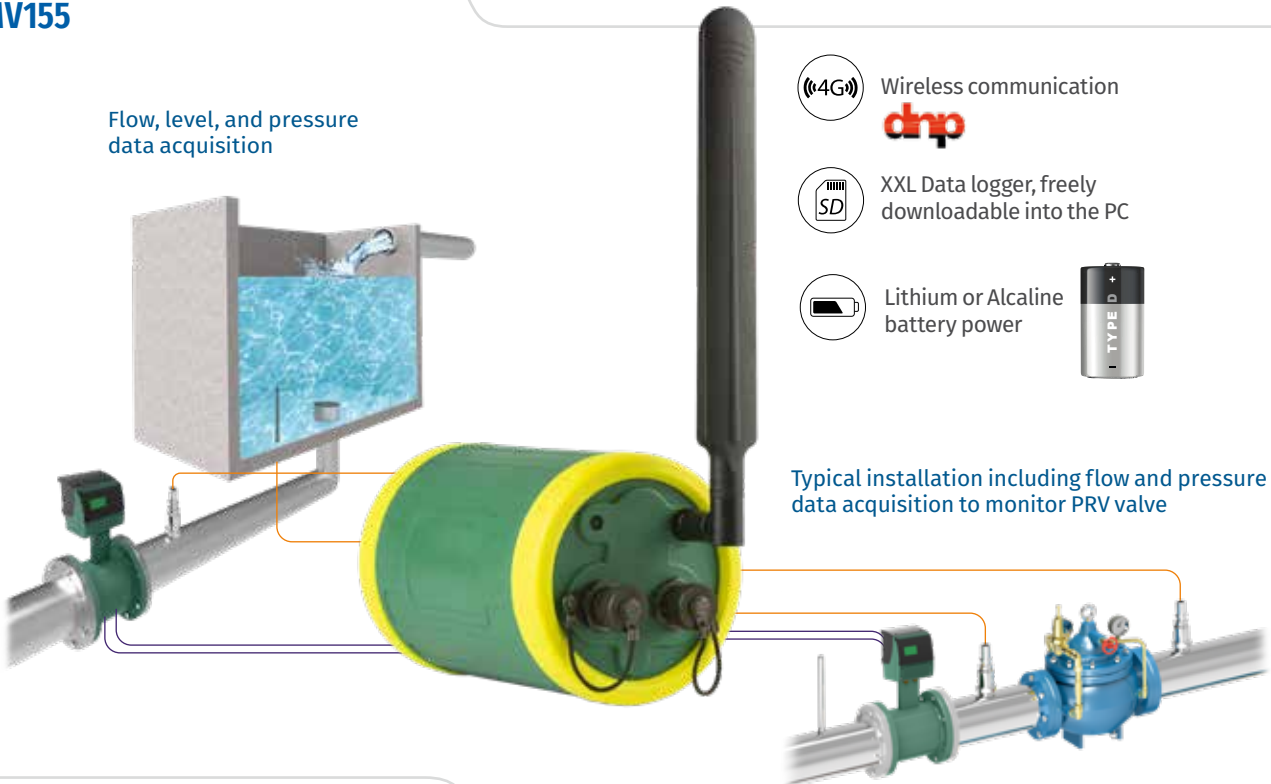

Anti-intrusion alarm – Real time SMS alert

PA6 fiber reinforced housing

MV155

Flow, level, and pressure data acquisition

Wireless communication

XXL Data logger, freely downloadable into the PC

Lithium or Alkaline battery power

Typical installation including flow and pressure data acquisition to monitor PRV valve
