Building Automation – Heating and Cooling

ISOFLUX[®]
The ultrasonic meter

ISOFLUX® ENERGY: KEY FEATURES

MI004 - EN1434 - Class 2

Up to 3 protocols simultaneously

Function "ONE" setting editing before installation

Integrated Datalogger

Maximum temperature: 90/130 °C

Protection class: IP65 or IP68

Different power sources

Calibration R100 or R250 (Qp/Qi)

ISOFLUX ENERGY

EN1434

HVAC & R

- Energy measurement and distribution
- Energy efficiency
- Custody Transfer
- Co and Tri-generation
- Hot and chilled water
- Data Center
- District heating
- Building Automation

Application

Designed for domestic and service sector applications, the IFX-E3/E4 energy meter link the flexibility of the "ONE" function with the opportunity to have three protocols simultaneously.

Their precision features make it the perfect instrument for shopping malls, offices and light industries applications, in addition to the classic residential applications.

ISOFLUX® PROTOCOLS AND CERTIFICATIONS

PROTOCOLS

BACnet - LoRaWAN - M-Bus - Modbus - RF - PULSES

CERTIFICATIONS

IFX E3

Connections and temperature probes

“ONE” FUNCTION

The “ONE” (Optimized & Nimble Editing) function allows the modification of some metrological parameter even when the instrument is MID approved.

This change must be done before the installation.

The editable parameters are:

- **Vector fluid measurement side**
- **Energy measure unit**
- **Activation and value of the input/output additional pulses**

TECHNICAL FEATURES

Power supply	12-24Vac/dc; 230Vac; Battery
Accuracy class	EN1434 - Class 2
Protocols	Up to 3 simultaneously
Protection rate	IP65 (IP68 optional)
Sizes	from 3/4" up to DN100
Qp values	From 0,6 m³/h up to 60 m³/h
Nominal pressure	PN25
Connection	Threaded or flanged

Memorization

The thermal energy meter IFX-E3 has an integrated datalogger which allows data recording:

- every hour
- every day
- every month
- every year

Protocols

Having up to 3 protocols simultaneously allows the IFX-E3 to be fully integrated with old and new integration systems, both wired or wireless and IoT ready.

Pulses

The Pulse I/O module allows the meter to receive volumetric pulses from hot or cold water counter, or sending pulses for volume or energy totalizers or alarms.

Flow sensor

The body is made of brass, capable to work up to 25 bar pressure and up to +130 °C temperature.

TEMPERATURE PROBES

DS - Direct contact probes

TECHNICAL FEATURES

Class	B
Approval	MID MI004
Particularity	Pairing selection
Max cable length	10 m

Ball valve (1" and 1"1/2)

PL - Pocket mounted long probes

TECHNICAL FEATURES

Class	B
Approval	MID MI004
Particularity	Pairing selection
Max cable length	10 m

Pocket
(85 mm - 120 mm - 210 mm)

IFX E4

Flow sensor

The flow sensor is made in composite material:

- Robust
- Up to 90°C
- PN16

Memorization

The thermal energy meter IFX-E4 has an integrated datalogger which allows data recording:

- every hour
- every day
- every month
- every year

Protocols

Having up to 3 protocols simultaneously allows the IFX-E4 to be fully integrated with old and new integration systems, both wired or wireless and IoT ready.

“ONE” FUNCTION

The “ONE” (Optimized & Nimble Editing) function allows the modification of some metrological parameter even when the instrument is MID approved.

This change must be done before the installation.

The editable parameters are:

- *Vector fluid measurement side*
- *Energy measure unit*
- *Activation and value of the input/output additional pulses*

TECHNICAL FEATURES
